An enthusiastic Information Technology student specializing in web development and back- end systems. Driven by a passion for innovation, continually refining technical skills through practical projects and client-focused work.

Skilled in database management, system design, and UI/UX design, with hands-on experience creating projects like a flight time tracker and a management system. Known for solving challenges such as improving product display efficiency and optimizing space to enhance user experience. A natural leader, I collaborate with teams and clients to bring ideas to life, meet deadlines, and deliver results that exceed expectations.

EDUCATION

De La Salle University Dasmariñas
Bachelor of Science and Technology
Specialization in Web Development
Deans Lister (2021-2023)

Dasmariñas City, PH

Project Leader | Full Stack Developer
May 2025

Dasmariñas City, PH
May 2024 -

- Dormitory Management System: Managed the entire development process, assigned tasks, monitored progress, and ensured timely project completion.
- Built and maintained server-side functionality using Express.js, Node.js and MongoDB, ensuring data accuracy and smooth system performance.
- Designed and implemented user-friendly interfaces using React.js, focusing on an intuitive and responsive user experience.
- Improved communication and workflows between tenants and administrators, streamlining tenant management and facility maintenance while reducing paper-based processes.

B1G Corporation
Project Leader | Full Stack Developer
March 2025

Muntinlupa City, PH
February 2025 -

- **Sales & Order Management System:** Led the full-stack development of a real-time sales system using Express.js, Node.js, and MongoDB Atlas with Socket.io for seamless communication.
- Developed admin-side functionality for monitoring orders, managing product pricing (with price types), and assigning different roles to newly created admins.
- Enabled the creation of agents who can submit orders, with price visibility controlled by admin-defined rules.
- Implemented a clean and responsive UI to handle both agent and admin workflows.

- Integrated printable order receipts, improving transaction documentation and user experience.
- Built data analytics dashboards for revenue tracking by run date, with visual breakdowns of monthly, weekly, and yearly performance.
