- Analytical Thinking

Franco Luiz Romey

Full Stack Developer

Profile Summary

Passionate full stack developer with expertise in building responsive web applications, efficient back-end systems, and database design. Experienced in leading projects from conception to deployment, delivering innovative, user-centered solutions that enhance efficiency and exceed expectations.

Work Experience

Sept 2024 - May 2025
Quantum Care Medical Product Inc

E-commerce Web Developer

- Using Shopify, designed and implemented custom website layouts to enhance functionality and visual appeal. Conducted in-depth research on UI/UX strategies to optimize website performance and user experience.
- Delivered a more accessible and conversion-focused website that increased client inquiries, boosted online sales, and improved overall customer engagement.

Oct 2024 - Feb 2025
De La Salle Univeristy Dasmarinas

Project Leader | Full Stack Developer

- Led the development of a Dormitory Management System, overseeing team progress, delegating tasks, and ensuring timely project completion, which improved project efficiency and enhanced team collaboration.
- Built and maintained server-side functionality and responsive React.js interfaces, streamlining tenant management and facility maintenance, leading to improved communication, reduced paper-based processes, and increased operational efficiency.

Feb 2025 - May 2025
B1G Corporation

Project Leader | Full Stack Developer

Forge Philippines

- Developed a modern campaign website with age verification, user authentication, and an interactive rewards system featuring promo code redemptions and gamification elements (Spin Wheel, Slot Machine), driving increased user engagement and bringing over 800 retailers onto the platform.
- Implemented an admin dashboard for content management, data analytics, and user role management, optimizing the site's functionality and security.

B1G Sales System

- Developed a Sales Management System using Node.js and Express, featuring multi-level user roles, inventory management, order processing, and client relationship tracking, enhancing operational efficiency and streamlining sales processes.
- Implemented sales analytics dashboards, secure authentication, and RESTful API integration, providing actionable insights into sales performance, improving data-driven decision-making, and boosting overall team productivity

B1G Official Website

- Built the official corporate website for B1G Corporation with dynamic product pages, a categorized blog system, an inquiry page for customer communication, and responsive design for all device sizes — helping potential partners easily connect with the company and increasing partnership inquiries through the "Be Our Partner" page.
- Integrated a subscriber-based newsletter system with automated email delivery and Google Sheets tracking, streamlining updates and keeping users informed about the latest news and products.
